Be aware that a nominal 11.1v battery is 3 LiPo cells, or 3S, which could range from as low as 8.1v to as high
as 12.6v. Similary the 4S battery could cover 10.8v to 16.8v. However, you don't need to use all of the range,
at the cost of capacity.

So there is no practical way to manually charge a Lipo battery pack. It is nearly impossible for a person to
manually charge a Lipo pack and ensure that all the cells are balanced. You need to measure voltages to a
thousandth of a volt (.001v) and a voltmeter that accurate is very expensive, plus you need a voltmeter for
each cell too.

This lithium ion pack is individually boxed for safe shipment. It is made with safe, light-weight 18650 cells
for a long life. This fully PCB protected battery pack are UN38.3 certified and ...

The popular voltage sizes of lithium-ion batteries include 12V, 24V, and 48V. Let's understand the discharge
rate of a 1-cell lithium battery at different voltages. Lithium-ion Battery Voltage Chart:

The 11.1 Volt Lithium Ion / Lithium Polymer Battery Pack Smart Charger is a must-have accessory for RC
enthusiasts and professionals seeking reliable and efficient charging solutions. With its intelligent charging
capabilities, visual feedback indicators, compact and lightweight design, versatile connectivity options, and
UL-approved safety ...

The 11.1 Volt Lithium Ion Battery Pack with a capacity of 6600 mAh and comprehensive protection features offers a powerful and reliable energy storage solution. With its no memory effect, longer storage life, lightweight design, and high energy density, this battery pack provides efficient and safe power for your devices. ...

11.7 volts at rest is a NEAR FULLY DISCHARGED BATTERY as was stated earlier. Yes, the starter may try to turn at 11 or 12 volts BUT - and it's a big BUT - the battery may be sulfated and exhibit a very high internal resistance which prevents any significant current flow thru the starter system.

Installed PCB (4 Amp) will prevent the battery pack from over charge (> 12.6V), over discharge(4.0Amp) and Short Circuits. It helps protect battery chemistry integrity and prolongs battery life. 4.2 Amp polyswitch installed to limit max. discharging current ...
