Also, I'll be able to turn off my victron smart solar 150/60 using the remote off relay. I feel that is a better way rather than using relays/contactors and risking damaging the solar charge controller or the inverter/charger. The Batrium is capable of doing that too but it is super expensive in comparison to the 123 smart bms.

Because you only "generate" solar leads while spending money, your costs will rack up quickly and leads will disappear entirely as soon as you put your wallet away. That's why we prefer inbound marketing at Userlike. Still, list buying can indeed bring you some results, and it isn't a tactic that should be dismissed completely.

When you consider how much solar leads cost, consider the costs of doing it yourself, too. If you don't want to become a marketer too, you should buy your solar leads. By buying solar leads you don't need to reinvent the wheel, and you can choose from reputable solar lead generation companies that specialize in solar leads.

Exclusive solar leads and live transfer leads are high-quality leads sold by lead generation companies to only one solar company. These leads are carefully vetted to ensure that they are interested in pursuing solar options and can provide a unique opportunity for solar companies to make contact and build a relationship with potential customers.

The price of solar power generation in Texas has dropped by 43% in the last ten years, with an average cost now ranging between \$2.31 to \$3.13 per watt. And with 3,700 sunny hours or 233 sunny days a year, Texas homeowners are now seeing it ...
