A 36V 10AH/16AH lithium battery offers numerous benefits that enhance your riding experience. One of the key advantages of a 36V lithium battery is its long-lasting power. With a higher capacity like 10AH or 16AH, you can enjoy extended rides without worrying about running out of juice mid-journey.

Lithium-ion batteries pack more power into smaller, lighter units. Charge batteries faster, over a longer battery life (we've got the 2-year battery warranty to prove it!) and experience greater reliability. Push it to the MAXX with the 16AH airline-compliant lithium-ion battery pack** for over 21 km of range in the lightest package yet!

We are considering a 15ah lead-acid battery against a 9ah Li-Ion battery here because the usable capacity (in typical high-amperage use on an E-Bike - see Peukert's Law) of the 15ah lead is only about 9ah (66%) - note that they have the same range. As you can see there is a lot to consider if you really want to delve deep into lithium battery packs that are made to power ...
