An 18650 battery is a type of lithium-ion rechargeable battery. The numbers "18650" refer to the battery's dimensions: it is 18mm in diameter and 65mm in length. 18650 batteries are commonly used in electronic devices such as laptops and flashlights, as well as in electric vehicles and other high-power applications.

History of the 18650 Battery The lithium-ion battery was first invented in the 1970's by an Exxon researcher named Michael Stanley Whittingham. His pioneering work to create the first version of the lithium ion battery then set in motion decades more research to finetune the battery to be as efficient and safe as possible.

The popularity of 18650 rechargeable batteries comes from 3 main factors: price, availability, and usage. These lithium batteries are cheap, compared to other options, they can save a lot of money. Many worldwide known brands produce 18650 lithium-ion batteries, which makes them available at different prices and specs.
