2003 Silver 3.2 TL ... If it really IS a high-pressure power steering hose, that's not a bad estimate. It's NOT a trivial job at all - you'll need special tools (crow's foot wrenches for disconnecting the line going into the rack), will have to drop the front subframe down (I did it by gingerly loosening the bolts until I was certain they were ...

If you are saying it is coming out the top of the reservoir, the problem is that there is air in the power steering system. When you run the engine the fluid gets pumped into the rack where any movement tries to turn it to foam, forcing the fluid out of the reservoir. It also makes noise. Power steering systems are often hard to burp.
