<- Back to All Honda Information. November 29. How to bleed Honda Power Steering systems. 1. Do NOT start the engine until the system is fully bled, doing so may cause damage to the power steering components. Pump internals are metal to metal so any air in the system can cause metal to metal contact and resulting damage. 2.

Nonetheless, stay tuned for any further updates from Honda and NHTSA. Honda Accord power steering problems are being investigated by the National Highway Traffic Safety Administration (NHTSA). This type of failure can cause a car to drift in the direction you don't want it to go and may even lead to an accident.

I replaced my power steering pump two days and I've been bleeding it for hours between then and now and it's not fully bleeding all the air out. I've gotten it to the point where I can drive it around my neighborhood but it still gets tough to steer every 30 seconds and lasts for about 10-20 seconds.

To my understanding it may be part of the steering system (power steering fluid)? You can see in other pictures how the grease got caked up below where it connects to that pulley (don't know the names). ... This is part of a recall on the 2007 Honda Accord. Dealerships may replace the power steering pump as part of a tune-up, but other repairs such as replacing worn parts may also be necessary depending on the severity of the issue. If you have any concerns about your Honda Accords power steering, bring it to your nearest dealership for evaluation.

If you are saying it is coming out the top of the reservoir, the problem is that there is air in the power steering system. When you run the engine the fluid gets pumped into the rack where any movement tries to turn it to foam, forcing the fluid out of the reservoir. It also makes noise. Power steering systems are often hard to burp.
