Check Power Steering Level: 2010 Acura TL SH-AWD 3.7L V6 SH-AWD 3.7L V6. Our research indicates that your vehicle has an electric power steering system ("EPS" or "EPAS"). These systems use an electric motor instead of a hydraulic system and therefore do not have any power steering fluid to leak. Electric power steering typically require less ...

You don't actually have to bleed a power steering system as such, its not like a brake system. If the fluid bottle was empty and you refilled it, or you have replace the steering pump then it's ...

Power steering fluid flows through the power steering hydraulic system. The system is pressurised by the power steering pump and by way of valves, plungers, or pistons decreases the effort needed by the driver to turn the steering wheel. When the pump stops pumping, the pressure drops and the power steering system loses its hydraulic pressure.

Step 1 - Raise and secure the chassis. Just raise the car up and secure to the proper jacking points. Use the front jack point on car's subframe and set two stands on either side of the car, under the reinforced pinch welds running the length of the underbody.
