How Reliable Is the 2018 Honda HR-V? J.D. Power gave the 2018 HR-V a predicted reliability rating of three out of five, which is about average. Read more about HR-V reliability » ... The EX-L Navi trim adds a navigation system, satellite radio, leather seats, and a leather-trimmed steering wheel.

WOW - the only thing that could "normally" cause air flow changes would be fan speed setting (AUTO settings will adjust the speed up and down variably) - and the recirculation/fresh air switch would cause the air to take a different path (same speed setting would have a different sound and diff amount of air out the grilles).

The yellow check engine light, brake system light, power steering light, VSA light are on, and the red brake light is flashing. The parking brake still functions as do the power steering, rear camera, and blind spot warning lights. I changed the battery about 40 days ago and the systems recalibrated without issue.

Got in the car today and a message popped up on the main system screen (the one with the radio, etc.) that said something like the security system has lost connection and hold ...

A 2016 HR-V owner even reported a considerable loss of power, needing transmission belt replacement and computer system updates. Additionally, gearbox explosions have been observed in Honda HR-V vehicles from 2016 to 2018. Despite these transmission issues, it's essential to note that the Honda HR-V is still a dependable SUV.
