3kW systems are small and usually have between 8 and 11 solar panels. The actual number of solar panels within a 3kW system depends on the wattage of the solar panels. Higher wattage panels are more efficient than their lower-wattage counterparts. Typical panels have wattages of between 275-400 watts.

As residential solar panels are generally rated between 330 watts and 400 watts these days, a 3 kilowatt (3,000 watt) solar system will require about 7-10 solar panels. A typical solar panel is around 1m x 1.7m, therefore a 3kW system will require about 12-17 m² of roof space, depending on the wattage of the panels.
