45 watt solar panel kit

This solar panel kit is not designed for tie-in to a grid. Only a licensed electrician and a licensed building contractor can safely design and implement a grid tie-in system. Any grid tie-in system must meet all applicable building and electrical codes, and must meet standards established by the area power company. Improper grid tie-in can

The number of LED lights a 45-watt solar panel can power depends on the power consumption of each light bulb. Typical LED bulbs consume between 3 and 10 watts of power. A 45-watt solar panel could power around 4-15 LED bulbs simultaneously, depending on their wattage. Can I use a 45-watt solar panel to charge an electric vehicle?
