assessment of PV plants. If these sensors are not measuring the true irradiance at the site, for example because they are soiled, then underperforming issues at a PV power plant can potentially be masked. Soiling is one of the largest loss categories in PV plant performance for sites in dry climates, which are often the same

As it has been a tradition for nearly a quarter of a century, once every 4 years, three of world's most prominent international photovoltaic technical conferences, the Photovoltaic Science and Engineering Conference (PVSEC), the European Photovoltaic Solar Energy Conference (EU PVSEC) and the IEEE Photovoltaic Specialist Conference (IEEE PVSC ...

This abstract is then reviewed by the PVSC program committee. If it is accepted as a high quality abstract, you will be asked to submit the required final paper to the IEEE J-PV by June 9, 2017. The majority of PVSC-44 manuscripts will be published in the Proceedings of the 2017 PVSC-44 with only final review for adherence to style requirements.

In addition to an exceptional Technical Program, the 46th PVSC will include an exciting Tutorial Program, taught by world's leading PV specialists, and a High School Solar Projects competition, giving PV researchers the opportunity to interact with the next generation of researchers.
