The 12-blade 90mm fan, high-power brushless inrunner motor and 130-amp ESC combine with your 6S 4000-7000mAh 30+C LiPo battery to deliver great ...

The E-flite® Viper 90mm EDF Jet model follows suit, both in its appearance and how it delivers the widest flight envelope possible -- whether you've flown many jets before or even if it's your ...

The Zeus 90mm EDF sport jet comes with CNC-machined struts with a trailing link design that can handle most reasonably-mowed grass fields with ease. The Zeus features daylight-bright LED lights on the wing tips, top and bottom of the fuselage, as well as a landing light that is mounted on the nose gear strut.

The Zeus 90mm EDF 8S PNP sports the new 12-blade 90mm EDF unit with a powerful 4075-1350Kv inrunner motor for high end EDF jet performance. The Zeus has fully sequenced gear doors, including inner main gear doors for ...

The power system utilizes a sweet-sounding 90mm 12-blade EDF system driven by a 3546-1900Kv brushless motor and 130A ESC combination for tremendous acceleration and speed when coupled with your high-C, 6S LiPo battery. If a twin-tail sport EDF has you excited about jet aerobatics, this Super Scorpion will not disappoint.

The 90mm edf's are designed to operate from 30,000 to 47,000 rpm. Speeds vary based on the weight and aerodynamics of the jet. The 120mm edf units are designed to operate around 24,000 to 38,000 rpm. Be sure to use a watt meter when programming the power system to check the watt and amp draw. This can be limited by adjusting the throttle epa's.
