

Always on sealed lithium battery

The Difference between Lead-Acid and Lithium Batteries While that is the major difference between sealed and lead-acid batteries, there are many critical differences between lead-acid and lithium batteries, including the point, incidentally, that lithium batteries also happen to be sealed batteries. They just aren't referred to as sealed, because all lithium batteries are sealed, ...

Upgrade your smoke or carbon monoxide detector to a Kidde device equipped with 10-year,* sealed-in lithium backup battery. You can count on smoke and carbon monoxide detection - even if the power goes out. Worry-Free Combination Smoke and Carbon Monoxide Alarm with Sealed Lithium Battery Power P3010CU.

Lead-acid batteries do not lend themselves to fast charging and with most types, a full charge takes 14 to 16 hours. A Lead-acid battery must always be stored at full state of charge. Low charge - causes sulfation, a condition that robs the battery of performance. Adding carbon on

The Worry-Free Hallway Smoke Alarm is maintenance-free; never replace a battery during the alarm's operating life, in addition to the benefit of maintenance free, batteries are sealed, no need to worry about them being removed; It's Always On: 24 hr/day, 7 day/week protection from smoke and fire Decade of protection: sealed lithium battery provides 10 years of continuous power

Part Number (Ordering Number): 21009663 Sealed-In Lithium Battery - Sealed-in lithium power supply; no battery replacement required over the 10 year life of the alarm. Eliminates worry about battery removal or unauthorized deactivation of alarm.

Smoke alarms should be placed outside each sleeping area and on every level of the home. This alarm is powered by a 10-Year sealed-in, non-replaceable long life lithium battery.
