

Ametek power and data systems

AMETEK's Power Instruments is a leading manufacturer and supplier of data loggers, temperature recorders, portable data loggers and data recorders for a wide range of industries, such as aerospace, chemical manufacturing and electromechanical.

AMETEK PDS (AMETEK Power and Data Systems) is a supplier of components and systems for power generation and distribution, motion control, data acquisition, and cockpit instruments operated by AMETEK. It offers primary power distribution, solid-state power controllers, circuit breaker panels, linear and rotary actuators, starter generators, and ...

With strong brands, a broad product portfolio, exceptional precision power conversion and control expertise, proven power system integration capabilities and deep applications knowledge, AMETEK Programmable Power is your source for programmable power supplies, precision data acquisition instruments, and more.

AMETEK Power and Quality Recorders (P& QR) provide high performance power quality recording ... For the electrical utility, this is an economical way to monitor power system disturbances on the power distribution grid for all your key accounts. For the facilities manager or power quality department, this is an ... DATA STORAGE Hard Disk o 6.4 ...

VTI Instruments is an AMETEK Programmable Power brand and a leader in test and measurement equipment. ... VTI Instruments delivers precision modular instrumentation and systems for electronic signal distribution, acquisition, and monitoring, used in the world's most demanding test applications. ... Data Acquisition for White Goods. In this new ...

The core strength of AMETEK Recorders is the extensive triggering and recording capabilities to ensure you never miss an event. The DR-300 has a 64 GB solid state drive for recording high resolution data at longer durations. The flexible triggering options make it easy to capture a simple fault or uncover a complex system anomaly.

As a recognized leader in power distribution, AMETEK PDS offers a complete range of COTS and custom AC and DC power distribution solutions designed to solve simple and complex problems for the aerospace & defense industry, and with the expertise to integrate all parts of the generation and distribution system. AMETEK PDS power distribution ...

The Sorensen(TM) Modular Intelligent-Bidirectional Energy Amplified (Mi-BEAM) Series is the newest addition to the AMETEK Programmable Power portfolio of high-power testing solutions. The new Mi-BEAM Series features full DC source and sink capabilities with power levels from 12kW up to 37kW. The Mi-BEAM Series is fully scalable up to 1.2MW with parallel systems.

Aircraft OEMs around the world trust AMETEK Sensors and Fluid Management System's suite of air data

Ametek power and data systems

products to measure and relay critical flight information. ... Military-Grade Low-Weight and Low Power Consumption Air Data Computers ... AMETEK Sensors and Fluid Management Systems (SFMS) offers a variety of critical air data sensors for the ...

With our diverse range of power supplies, custom design capabilities, and comprehensive service offerings, we are committed to meeting the evolving needs of our customers across various industries. Whether it's standard power supplies or specialized solutions, AMETEK's HDR Power Systems is the trusted partner for reliable power.

system performed as expected. Data includes faulted circuit and phases, magnitudes and ...
o Compare power system performance by site
o Compare results to industry standards (CBEMA, ITIC, user programmed) curves and ...

Ametek power and data systems

Our accomplished team of business architects has a common goal: to ensure our client's power quality needs are met. Whether it be through our field sales staff, customer service, engineering, marketing, operations or finance capabilities, AMETEK Power Quality Solutions will work with you to ensure quality electrical power protection and monitoring to keep your business in business.

of several key power system quantities along with an overview of the applications that they're intended for. 1 Power System Measurements - Fundamentals of Windowing Measurement of power system quantities such as phasors, frequency, harmonics, etc. involves a few fundamental steps - 1. Sampling and acquisition of line voltages and currents. 2.

AMETEK Solidstate Controls has been building the world's most robust, industrial, uninterruptible power supply systems (UPS) for more than 56 years. Each system is created specifically to meet each of our clients' needs, with completely customizable configuration.

AMETEK Power and Data Systems 4550 S.E. Boulevard . Wichita, KS 67210 . Revision Date:07/19/2022 AMETEK - Supplier Quality Codes Page 2 of 7. Changes are in Bold Blue Text . Revision Date Summary of Changes 07/18/2022 . Added Revision Table 2.1 - Added Manufacturing Location .

Electromechanical - a differentiated supplier of automation and precision motion control solutions, and highly engineered electrical interconnects, specialty metals and thermal management systems; AMETEK has been publicly traded on the NYSE since 1930 and is a component of the S& P 500. To learn more about AMETEK, Inc., visit

The AMETEK Programmable Power designs, manufactures, and markets precision, ac & dc programmable power supplies, electronic loads, application-specific power subsystems, and ...

The AMETEK Power & Data Systems ACL23A-4 Actuator is a single-motor, dual-ram linear electromechanical actuator weighing less than two pounds (1kg) and capable of operating loads over 550 pounds ...
