In the box, Anker provides three cables for recharging the Solix C1000 -- one for plugging into an AC wall outlet, one for using your vehicle's 12V car socket, and one with two XT60 plugs to connect two solar panels to your power station. Besides the cables and some documentation, the only thing you'll get in the box is the Solix C1000 itself.

While it is a very good power station, it lacks some of the features of the C1000 in terms of ports, connectivity, and battery chemistry. All of this leads to a larger unit that isn't going to be able to provide the kind of power output levels that the Solix C1000 can offer.

Ecoflow Delta 2 had the leg up on mobile connectivity, max AC output, solar, and cost vs the last Anker. Not sure now with the new one Anker has. If it has better specs than the Ecoflow I would definitely consider that.
