The deal proposes tackling all these issues at once by transitioning to 100 percent renewable energy in 10 years with the goal of helping the U.S. achieve net-zero emissions.

Renewable energy is energy that comes from a source that won't run out. They are natural and self-replenishing, and usually have a low- or zero-carbon footprint. Examples of renewable energy sources include wind power, solar power, bioenergy (organic matter burned as a fuel) and hydroelectric, including tidal energy. ...

Aoc renewable energy pic

At the Capitol Power Plant we are planning for the future. Through rigorous analysis of various energy technologies and broad consultation with leading experts, we explored options for achieving future energy savings, reducing environmental impacts and maintaining a reliable source of chilled water and steam for the 23 facilities on Capitol Hill we serve, including the ...

Over the last fifteen years the AOC has reduced its energy intensity level by more than 50 percent. As a result of these energy savings, the U.S. House of Representatives building-related carbon footprint has been reduced by 48 percent. The AOC uses Department of Energy (DOE) calculations and tools to validate and track these energy
