The energy crisis in Nigeria is caused by various factors such as funding problems, energy loss, inadequate budgetary provision, corruption, leadership crisis, poor maintenance and neglect of projects, lack of technical skills, infrastructural decay, gas shortages, electricity bills/tariff shortages, low energy investments, power generating problems, and macroeconomic ...

The reason is that the same absolute amount of renewable energy yields a higher renewable energy share, if energy demand growth is diminished because of energy efficiency. As for energy intensity, the annual gain has jumped from an average of 1.3% between 1990 and 2010 to 2.2% for the period 2014-2016, whole falling to 1.7% in 2017 [ 12 ].

The transition, prompted by carbon emissions that exacerbate climate change, is vast and includes renewables such as solar, wind, and hydro. But is transitioning as simple as choosing renewables for energy? What other ...

The International Energy Agency (IEA) says global renewable energy capacity is set to almost double over the next five years. It says the energy crisis has forced governments to ...

The United States is developing its renewable and fossil-fuel domestic energy resources to insulate itself from global energy tensions and price volatility. Globally, whether investments...

Among various renewable energy technologies, solar power generation is the most common and well-known technology and has been actively applied worldwide (Rezk et al., 2019; Iqbal et al., 2021). Other than solar energy systems, renewable energy resources like wind, geothermal, and biomass energy systems have been getting good attention and promising ...

Sustainable development goals aim to promote the implementation of environmental and energy policies towards establishing a sustainable environment. Considering that energy demand has steadily increased in emerging countries along with their rapid economic growth, controlling CO<sub>2</sub> emissions in these countries is crucial to achieving global ...

Energy derived from fossil fuels contributes significantly to global climate change, accounting for more than 75% of global greenhouse gas emissions and approximately 90% of all carbon dioxide emissions. Alternative energy from renewable sources must be utilized to decarbonize the energy sector. However, the adverse effects of climate change, such as ...

Pursuing sustainable development in the face of climate change and environmental degradation has led to a significant shift toward renewable energy sources. A dependable, affordable, and stable renewable energy source must meet almost any future energy need. This review explores the environmental impacts of various forms of renewable energy, ...

# Apes energy problems for renewable energy

Most developed nations are dependent on non-renewable energy sources such as fossil fuels (coal and oil) and nuclear power. These sources are called non-renewable because they cannot be renewed or regenerated quickly enough to keep pace with their use. ... Environmental problems associated with oil shale recovery include: large amounts of water ...

The transition to renewable energy sources is vital for meeting the problems posed by climate change and depleting fossil fuel stocks. A potential approach to improve the effectiveness, dependability, and sustainability of power production systems is renewable energy hybridization, which involves the combination of various renewable energy sources and ...

Storage shortfall InterGen's battery facility currently being built on the Thames Estuary will be the UK's largest, with 1 GWh capacity. The UK needs 5 TWh of storage to support renewable-energy targets. (Courtesy: InterGen) On 16 September 1910 the Canadian inventor Reginald A Fessenden, who is best known for his work on radio technology, published an ...

Hence, RE is the best sustainable energy source on the planet. 15 Investment in RE can significantly manage energy-related environmental impacts and reduce the adverse socio-economic problems that arise from fossil energy production and consumption. 16 A recent study by Kumba, Akpan, Twite and Olanrewaju 17 discussed the challenges with the ...
