Apex Solar did an excellent job through the entire process. I am seeing substantial savings on my electric bill and now that it is spring my system is producing more electricity than I use. Great Job! When picking who we were going to work with for our residential system. It was tough to decide. However I couldn't be happier that we chose Apex.

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a "bulk price".

The REC Alpha Pure-RX panels are compatible with a wide range of solar inverters and mounting systems, making them easy to integrate into new or existing residential solar installations. With a module current of 9 A, these panels are also suitable for use with module-level power electronics (MLPE) devices, such as microinverters and power ...

As of October, 2024, the current price to have solar panels installed in Apex, NC is \$3.25/W. Utilizing this rate, expect the price to be \$3,250, on average, for every 1000 watts (or 1 kW) of solar energy your solar system can produce. In Apex, the price of a 5 kW solar system is generally \$11,375, after you subtract 30% federal tax credit.

Apex solar panel price
