That's easy to do because the answer is -- absolutely nothing! This is because Astronergy solar panels are real while Astro Boy is a fictional character. What's more, he's a fictional character who is nuclear powered. The literal translation of his Japanese name is Atom and his sister is called Uran, which is short for Uranium.

Tier one means banks and financial organisations are willing to lend money to large scale solar energy projects using those panels. It's not a direct measure of quality, but panels that are crap aren't going to get tier one status, so you can be confident these solar panels are most likely reliable. Conventional Astronergy solar panels have:

The solar panel manufacturing business, Astronergy Solar, was founded in 2006 and is based in Hangzhou. Astronergy also have an EPC capability domestically in the Chinese solar market. The business currently claims to have revenues of AUD\$2.9B and a manufacturing capacity of 12GW spread across China, Thailand and Vietnam.

The performance warranty offered by Astronergy depends on the model and the cell type. Most of Astronergy's p-type solar panels come with a 25 year warranty guaranteeing 84.80% of the nameplate value at the end of the period, while the n-type solar panels offer a 30 year performance warranty guaranteeing 87.40% after 30 years.
