

Australian solar company asx

Although - a little surprisingly - when it comes to genuine green energy ASX stocks, there aren't too many Australian companies available to choose from. Sure, Origin Energy Ltd (ASX: ORG) can talk up its solar and wind energy credentials, but it still owns Eraring, Australia's largest coal-fired power plant.

It also demonstrates the union's support for ClearVue as an Australian solar building materials company. Project architects Hayball () aim to receive a 5-Star GreenStar certification and a ... (ASX: CPV) is an Australian technology company that operates in the Building Integrated Photovoltaic (BPIV) sector which involves the ...

ASX renewable -- or green -- energy shares are companies which focus partly or exclusively on energy coming from sources such as solar, wind, geothermal, and in some cases, nuclear (though this last category is subject to considerable debate). By contrast, traditional fossil fuel-sourced energy like coal, oil and gas are viewed as non-renewable.
