First off, you'll need to ensure that the backup power source actually provides enough power. Most portable electric generators are too small to provide the minimum 10 kilowatts of power, so you'll most likely need to install a ...

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter--which turns the battery's stored energy into usable power--wrapped into one unit.

The TYPE S POWERGEN 500 is a portable gasless generator capable of powering and charging your favorite mobile devices, accessories, tools, and appliances on-the-go, or at home when the grid goes down. This high-capacity, 500Wh power station can even charge your 6V or 12V vehicle battery. Equipped with dual 120V outputs

Even "Deep Cycle" RV batteries do not like going below about 70% State-of-Charge....doing so dramatically shortens life. You can take a car battery down to 10% SOC maybe five times (if you promptly charge it right back up). An RV battery, maybe ten times. A gel cell (promptly recharged afterward) can come back up to 200 times.

## Auto battery backup power

The Tesla Powerwall is one of the most well-known home battery systems. Priced at around \$9,300 before professional installation, the Powerwall 3 offers 13.5 kilowatt-hours (kWh) of storage capacity.
