Excellent! Now that you've got the correct power-steering fluid in the power-steering system, the steering system should behave as designed. Just keep an eye on the power-steering fluid level, since even a slightly-low fluid level can lead to the PS system sucking the reservoir dry, which can prompt power-steering pump cavitation, resulting in a "groan" noise in the PS system.

I searched the forums (well, the B5 and B6 forums, didnt want to wade through 1200 posts in all forums) trying to find any info on the power steering return hose. basically im trying to find out how easy/difficult it is to replace the thing myself. a shop wants 60 bucks for the hose, 90 in labor to replace (plus 20 for a can of PS fluid which i already have). there is a leak ...
