One important part of your plan should be considering battery backups--also known as an uninterruptible power supply, or UPS--which will automatically take over when the power drops or goes out entirely. But no one solution's perfect for everyone.

Family Handyman. When the power goes out, your home network is helpless; you can't work from home, send that last email or keep your smart devices humming along. An inverter generator is one solution.. Generators are expensive, though, and if you just want to keep the WiFi on the benefit may not justify the cost. Enter the battery backup, or "uninterruptible ...

This means the UPS plugs into an electrical outlet, using power to keep its backup battery constantly charged. It also supplies a PC or other electronic devices plugged into the UPS with AC power via that wall outlet. Circuitry detects problems with the power (brownouts or interruptions), immediately switching the power source for connected ...

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.

In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics.
