Some CPAP batteries do not function as a UPS backup, and will require you to disconnect your machine from the wall outlet and switch it to battery power in the event of a power outage. Fortunately, for those worried about power outages, every battery on this list will function as a UPS except for the Zopec Voyage.

Most CPAP machines can be powered from a 12v or 24v CPAP battery pack, and require between 30-90 watts of power. This wide variation in power use is because your machine type (i.e. CPAP, APAP, or BiPAP) and pressure settings can change your machine's needs. Advanced features, like autoramp or leak detection, also tend to require more power.

Some CPAP batteries can be used like an uninterruptible power supply (UPS)! Usually your CPAP machine can either be plugged in to a wall outlet or to a battery. If your power goes out, you would need to manually change your power supply. However, some CPAP battery packs- like the Freedom V2 CPAP battery- can be used at the same time as AC power.
