I don't know too much about all this battery stuff but it's on sale for \$329 and seems to have good long lasting
power from what I read on the site. Am I way out in left field? ...

NOMA is losing it's name on this one. The Noma 1800 is indeed unreliable. Followup service and support
from Noma (whoever they are) is impossible to find. (even on the internet.) Some one suggested a class action
suit and I would suggest that Canadian Tire be included in the action.

Page 4 Turn on the unit by pressing the Power button for at least half a second. The energized. The front panel
ON/OFF button will not turn these outlets off. green AC Power LED confirms that the PowerSource 1800 is

Backup power system 1800 noma

on and ready to provide backup power.

A standby UPS computer backup system uses a little power to keep its battery charged (and to power a display if equipped with one), otherwise there is really no additional power draw compared to plugging your PC directly into a wall outlet. If you are concerned about power usage by an uninterrupted power supply, look for models that are Energy ...
