temperature-controlled fan and a remarkably low stand-by-draw underline the value System Power 10 550W U offers even at entry-level.

Building upon its name, the German cooling giant has recently introduced the System Power 8, designed with the "price-conscious PC builders in mind." Said range has seven PSUs - 300W-600W - though only the 400W, 500W and 600W are meant for PC enthusiasts. The other quartet are geared toward SIs for use in turnkey systems.

Be quiet system power 8 test

Dark Power 13. 1000W 850W 750W ...

We'd be happy to install something like the be quiet! System Power 8 600W into a mainstream build, and many system integrators will choose to do exactly that, but while these are fine for mainstream units they lack the reliability and quality you'd like to see in an enthusiast power supply.

Step forward be quiet!, a company whose premium PSUs tend to receive considerable press attention. Building upon its name, the German cooling giant has recently introduced the System Power 8, designed with the "price-conscious PC builders in mind."

As in the past the black box be quiet! uses has a large product picture at the front right beneath the company logo and the 80 Plus Gold certification and just over the product name and output. At the rear we find the units electrical table, several certifications, the serial numbers and barcodes, unit output and of course a 2D barcode which ...

According to be quiet! it's practically inaudible at up to 50 per cent load (300W) and then rises steadily and predictably until full chat. System Power 8 needs to be installed into a wide range of chassis - big and small - so the 140mm depth makes sense. The other dimensions are typical, too, at 150mm wide and 86mm high.
