

Be quiet system power 9 vs u9

be quiet! System Power 9 400W offers renowned be quiet! reliability and quietness for price-conscious PC builders. Rock-solid stability with 2 strong 12V-rails; DC-to-DC technology for tight voltage regulation; 2 PCIe connectors for powerful GPUs; Temperature-controlled 120mm fan reduces system noise; Stand-by drain of less than 0.15 watts

System Power U9 600W offers renowned be quiet! reliability and quietness for price-conscious PC builders. Rock-solid stability with two strong 12V-rails; DC-to-DC technology for tight voltage regulation; Four PCIe connectors for support ...

The system power 9 is built by HEC and has been tested and performs quite well. The s12III is built by rsy, and is unknown on quality. I'd go with the system power 9, the main caps are only 85°C, so if you approach max load, might want to get some airflow around the unit

Power Supplies; be quiet! System Power U9 500W PSU Review: Affordable and Quiet. Reviews. By Aris Mpitiopoulos. published 5 April 2019. When you purchase through links on our site, we may earn an ...

its just an ideas. again like i said be quiet! system power 9 is fine unit, i am guessing that 3 year warranty is due to low cost sleeve bearing fan which can die quite quickly, even before 3 year warranty period, but as once some redditor said here, probably more than 3 years but expecting to last 5 years is quite a challenge. this is my opinion.

The System Power U9 lineup consists of four models rated for 400, 500, 600, and 700 W output. Be quiet! stresses that every PSU from the family is equipped with all kinds of circuit protection as ...

Yes, the PSUs from Bequiet are pretty good. I have the same Power Supply myself, but the 400W variant. They're barely audible while still being very reliable. If you aren't sure if you have ...

No disponible por el momento. No sabemos si este producto volverá a estar disponible, ni cuándo. Tamaño : 500W . 400W - - 500W - - ...

Bequiet is a company headquartered in germany, though their units are found all over the place, including the system power 9. From what I can tell, the differences between all u9 units is just the primary cap changing brands and capacity, same with the S9 lineup. The system power 9 and system power u9 are actually different units.

be quiet! System Power 9 600W offers renowned be quiet! reliability and quietness for price-conscious PC builders. Rock-solid stability with 2 strong 12V-rails; DC-to-DC technology for tight voltage regulation; 4 PCIe connectors for powerful GPUs; Temperature-controlled 120mm fan reduces system noise; Stand-by drain of less than 0.15 watts

The System Power 10 750 looks like a big step backward. I used to suggest the System Power (U)9 units to users wanting affordable and reliable PSUs with a high performance per price ratio, but this is not the case for the System Power 10 models. The aged HEC platform cannot match the competition despite the pair of upgrades that it received.
