Best power company for solar buy-back nz

difference of 10c per kWh between the best and worst price, it literally pays to check before signing up. Powerswitch manager Paul Fuge said the buy-back rate had shot up over recent years, with some retailers paying a lot more than others.

New Zealanders have been getting short-changed when it comes to buy back rates for solar power. For the uninformed, a buy back rate is the price paid by electricity retailers for excess solar power being exported to the grid (i.e. a solar power home generates energy but doesn't use it or store it). Most energy retailers pay per unit; 7 to 8 cents.

Powershop advises that it will buy back any excess generation from customers with a solar installation of under 10kW, and an appropriate import/export meter. Mercury offers solar buy-backs nationwide, and is currently running a fantastic buy-back rate in conjunction with Harrison's Solar.

Here are some key aspects to keep in mind: The buyback rate is when the electricity company credits you for the excess energy your solar panels generate. Compare different plans to find the one that offers the most competitive buyback rate. You'll want to know the rate the energy company charges you for the electricity you consume from the grid.

Solar PV isn't much help with winter power peaks. The bulk of solar generation is between 11am and 3pm. Solar panels also generate considerably more power in the summer, when the days are longer and the sun is higher in the sky. To get the best payback from solar PV, you need to use as much of the solar power as possible as it is generated.
