

## Best ups for home

We've chosen some robust and ultra-reliable UPS battery backups from some of the most respected brands in the industry. These systems offer robust battery backup for all your devices, fast-charge ports for portable devices, and advanced surge protection, among other great features. Our Top Picks.

CyberPower. A UPS -- short for an uninterruptable power supply -- is a battery backup that can help your computer stay alive through both routine, intermittent power glitches and straight-up power...

If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you. Its 1500VA/900W capacity should be more than enough for any modern gaming PC, as well as any monitors, TVs, speakers, or any peripherals you have plugged into it.

Best UPS Battery Backups. Best Overall: CyberPower CP1500AVRLCD3; Best Budget: Amazon Basics Standby UPS 600VA; Most Outlets: CyberPower CP1500PFCLCD; Most Advanced: APC BR1500MS2; Best Compact...

The CyberPower CP900AVR is the best UPS for people who want to back up a few small electronics--such as a modem, router, PC, external hard drive, or game server--during a blackout lasting up to...

Our pick for the best UPS overall goes to the APC BR1500G Backup Battery. At 1500VA/865W, it can power most devices, including computers, external hard drives, and wireless routers, from a few minutes to several hours, depending on the total connected load.

Selecting the Best UPS for Your Home's Power Needs. In an era where technology dominates the household, a power outage often leads to costly interruptions in our daily activities and potential damage to our cherished devices.
