

Bleeding a power steering system xterra

Spent today pulling the steering box out of the parts Jeep and putting in my Jeep. Steering still seemed overly tight, like the power steering wasn't working. I'd been getting a hiss from the power steering so I then changed out the pump with the one from the parts jeep. Still having the problem. No idea where to go from here.

1. NOTE: A whine heard from the power steering pump can be caused by air in the system. The power steering purge procedure must be carried out prior to any component repair for which power steering noise complaints are accompanied by evidence of aerated fluid. Remove the power steering pump reservoir cap. Check the fluid. 2.

Power Steering Pump Bleeding. Thread starter jlockhart26; Start date Feb 1, 2010; jlockhart26 New Member. Joined Feb 1, 2010 Messages 3 Reaction score 0 Vehicle Year 1998 Make / Model Ford Transmission Manual Feb 1, 2010 ... The power steering system bleeds itself. Turn it back and forth lock to lock a couple times and make sure it stays full.

mine started leaking 2 years ago, used a turkey baster to get as much of the old stuff out as possible and refilled using Lucas Power Steering Stop Leak - hasn't leaked a drop ...

Locate the power steering bleed valve on the steering box. If you have difficulty finding it, just follow the high pressure line from the power steering pump to the other end, which will be in the power steering box. Push a hose on the end of the bleeding valve. The hose should be long enough to reach outside the front of the car.
