Bose PS1/L1 with B1 Bass Module Portable PA Line Array Partial System This system brings full, natural sound to your performances and makes set ups and sound checks a breeze. The L1 Model 1 family of products puts the musician back in control of the music. Eliminates many of the common problems o...

I love this system. I wouldn't be selling it except the footprint has changed in my basement and I must let it go. It was meant to be a gig speaker system as it has gig bags; although I am missing the speaker bag. Not sure I ever got it when I bought it. I used in in my house. Sounds great. Has it's own preamp or you can hook it through another amp. There are slight dings in the speaker ...

Setup Unpacking Your Personalized Amplification System(TM) products are delivered to you in two cartons. One carton contains the PS1 power stand, AC power cord, R1 remote control with cable, protective plug, Owner's and Quick ...

Show more.

There are two LEDs on the PS1 Power Stand (Classic) / Model I near the Trim knob labelled Signal/OL -- one

Bose personal amplification system power stand model ps1

for Channel 1 and another for Channel 2. These LEDs indicate when the signal level channel's preamplifier reaches certain important thresholds. The trim controls located near the LEDs adjust the amount of gain in the preamplifier.

The Model II is an integrated system that supports Bose B1 and B2 bass modules. Connecting powered subwoofers to the Model II Power Stand Bass Line Out is not supported because EQ curves for the B1 or B2 are present at the Bass Line Out. This may or may not result in good results with a powered subwoofer.

Barely used Bose PA System, model PS1. I've used these for outdoor concerts (guitar+vocal) - they're very powerful and easy to use, and sound amazing. There are plenty of great reviews out there, and they're all true. I don't really use this ...
