[Long service life] The cycle life reaches more than 2000 times, and the standard charge (5 hour rate) use can reach 2000 times. The performance-price ratio will be more than 4 times that of lead-acid batteries. [Safe to use] Lithium iron phosphate has undergone strict safety tests and will not explode even in the worst traffic accidents. [High temperature resistance] The peak value of ...

Just got the battery. Super easy to wire up. Much more power and battery life than the original Lead batteries. Very happy with it. I have it wired to a 48V 1000w motor MotoTec mud monster go cart. I am 200 lbs and it pulls me around in grass and hills plenty of power. Lasts for hours. Don't hesitate just buy.

I have purchased a LiFePO4 BTR battery in the past, but it was a 48V 30Ah. The issue I had was it would never charge to its rated fully charged voltage of 58.4V. It would sit around 56.6. I am skeptical of purchasing a LiFePO4 pack from BTR again because of this reason.

My fault for buying a battery that I find too heavy to want to use - I bought it because of supposed safer chemistry vs lithium ion. BTW your battery is currently \$285 on Amazon and has 14 5 star reviews with no reviews lower than 5 stars. At least one buyer indicated that the battery arrived with shipping damage and was sent another battery.
