50 ft retractable cord + 4.5 ft lead-in cord: Offers a 50 ft retractable power cord for extended reach in your home or garage; ideal for powering high-demand tools like circular saws and drills; 4.5 ft lead-in cord allows flexible mounting of the reel without additional extensions; perfect for ...

The power cord reel retracts quickly and smoothly, and the ratcheting system will lock the cord at any length, or you can select a non-lock mode. The 16-Gauge SJT cord can resist tough condition and gives flexibility, lightness, and durability. This reel is both wall and ceiling mountable and the mounting bracket can rotate 180&#176;.

Your ceiling mount Power Cord System is designed to mount under horizontal surfaces, such as ceil-ings, and can also be mounted in a variety of other orientations (see figure 2 for examples). The ceiling mount is intended to hang freely, allowing the unit to spin 360 degrees. This model cannot be used as a portable unit.

The gauge of an extension cord does more than dictate its thickness. As a general rule, the more power you will need, the bigger the gauge (i.e. the smaller the number) you will need. Most household appliances will work off of a simple 16-gauge cord. However, table saws and major commercial tools will need a 12-gauge cord to achieve full power.
