CPS SC series grid-tied PV inverters can be flexibly utilized in different types of residential rooftops, commercial rooftops and some utility systems. Efficiency levels up to 96.5% grant customers high returns of power production.

The units are high performance, advanced and reliable inverters designed specifically for the North American environment and grid. High efficiency at 98.8% peak and 97.4% CEC, wide operating voltages, broad temperature ranges and a NEMA Type 4X enclosure enable this inverter platform to operate at high performance across many applications.

The headquarters opening comes on the heels of CPS America's release of their flagship inverter, the 250/275kW inverter. The 250/275kW is designed for solar sites from 2 MW to 2 GW and employs broad adaptability and flexibility a custom solar solution. The 250/275kW inverter will be showcased at RE+ in Anaheim in September. About CPS America

The 100 & 125kW (111 & 132kVA) medium power CPS three phase string inverters are designed for ground mount and carport applications at 1500Vdc. The units are high performance, advanced and reliable inverters designed specifically for the North American environment and grid.

The 100 and 125 kW high power CPS three-phase string inverters are designed for ground mount applications. The units are high performance, advanced and reliable inverters designed ...

The 200kW/200kVA high power CPS three phase energy storage inverter is designed for use in commercial and utility-scale grid-tied energy storage systems. The inverter is optimized to meet the needs of the most demanding energy storage applications including demand charge reduction, power quality, load shifting, and ancillary grid support ...

The CPS Flex Gateway is a data communications and controls solution for the CPS inverter line. The gateway acts as a Modbus master data logger and gateway solution for communications and controlling commercial and utility scale inverter applications.

The CPS 800Vac Breaker Box is designed for CPS 250/275kW three-phase string inverters to optimize system protection, installation, and wire management. The Breaker Box combines the output of up to (3) CPS 250/275kW inverters allowing a cost-effective solution for simplifying system designs and providing individual protection for each inverter.
