# Computer power battery backup

An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups. Losing power is stressful, so don't let your offline router and computer add to it.

One important part of your plan should be considering battery backups--also known as an uninterruptible power supply, or UPS--which will automatically take over when the power drops or goes out entirely. But no one solution's perfect for everyone.

Whether that's a blackout, brownout, or power surge, the best UPS battery backup will give you the time to save what you're doing and turn off your machine safely. Power surges and interruptions can be bad news for PC components, so what you're buying is peace of mind more than anything else.

For desktop computers, home theater equipment, personal electronics & more. 10 total outlets including 5 surge only and 5 battery backup + surge up to 1030 Joules; Battery backup keeps devices running during brief outages and provides enough runtime power for safe shut down; Surge and data line protection safeguards against sudden power surges or spikes ...

In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics.
