United States. In the United States, the Constitution has established a system of "dual sovereignty," under which the States have surrendered many of their powers to the Federal Government, but also retained some sovereignty. Examples of this dual sovereignty are described in the U.S. Constitution. Supremacy Clause

The federal court system is more powerful than the state court system(s) for cases under federal or concurrent (shared) jurisdiction, as established by the US Constitution. The state court system has more power over issues involving municipal and state laws and the state constitution, provided they are not in conflict with the US Constitution.

Concurrent powers exist in the United States to serve as a separation of powers. In the government system of federalism that the United States utilizes, two-levels of government exist: the federal ...

Explaining the new Constitution's proposed system of federalism to the people, James Madison wrote in "Federalist No. 46," that the national and state governments "are in fact but different agents and trustees of the people, constituted with different powers." Alexander Hamilton, writing in "Federalist No. 28," argued that federalism's system of shared powers ...
