Introduction : The power pack is used as a power source for VCB panels in substations where station battery supply is not available. Power Pack gets charged from line connected PT (burden 200VA). It can supply DC connected loads for operating Close/trip coils and other essential loads such as auxillary supply to protection relays etc.

Sometimes power is passed through (standby), sometimes this is an always-on thing (online), there's the in-between (line-interactive), but the general idea is the same. I am wholly unfamiliar ...

In most cases, those pieces of hardware include the main computer housing and the monitor, but other devices can be plugged into a UPS for backup power, depending on the size of the UPS. What Does a Battery Backup Do?
