Just finished up my solar installation and turn on from Sandbox Solar - it has been a wonderful and issue free process from start to finish. The whole team has been great to work with, from Andrew with the initial evaluation and proposal, to Efa coordinating the whole process, Cavin and his team doing the install over 2 days, and Tyler handling the electric work.

Although solar system outputs prior to leaving an inverter are low voltage, caution and safety are still paramount. Before attempting to disconnect the solar panels, isolate all AC or DC disconnect switches or fuses in the circuit. Try to make the disconnection at dusk, if at all possible when the panel output is low.
