At left, cars line up for gas during the 1970s energy crisis, which happened under President Jimmy Carter's administration. At right, Carter dedicates White House solar panels on June 20, 1979.

OverviewBackgroundCarter administrationRemoval under the Reagan administration21st centuryMechanical engineer Fred Morse was approached by the Richard Nixon administration to assess the potential of solar power. He took several years to work out what could be installed on the roof of the White House. The panels could not alter or change the look of the house, and were ultimately white as opposed to a darker colour for aesthetic reasons. The need for alternative sources of energy than fossil fuels and energy independence grew in th...
