The IBM® Hardware Management Console (HMC) provides systems administrators a tool for planning, deploying, and managing IBM Power Systems™ servers. This IBM Redbooks® publication is an extension of IBM Power Systems HMC Implementation and Usage Guide, ...

The Operations Console acts as a system console for you to access and administer your systems. IBM® facilitates interaction with your systems by providing management consoles that can be accessed through terminals and PCs. The Operations Console is an installable component of the IBM i Access for Windows licensed program. Using Operations ...

Learn about IBM® Power Systems™ Hardware Management Console Representational State Transfer (REST) application program interfaces (APIs). Managing Power Systems servers using DMTF Redfish APIs Flexible service processor (FSP)-based IBM® Power Systems™ can be managed with DMTF Redfish APIs.

Problem analysis, system parts, and locations for the IBM Power Systems HMC (7063-CR2) (approximately 1.4 MB) Servicing the IBM Power Systems HMC (7063-CR2) (approximately 5.8 MB) Event Codes for the IBM Power Systems HMC (7063-CR2) (approximately 635 KB) Diagnostics and service aids (approximately 2.2 MB) SAS RAID ...

This function is available only in the manual operating mode and when activated by the service processor. You can use function 41 to dump the main storage data of IBM POWER® Hypervisor™. The following table shows an example of function 41. Table 10. Function 41: Start a platform dump Table 10. Function 41: Start a platform dump

I've always used an HMC to be a console. Currently we use a vHMC under vmware. I know there are other types of consoles, like Lan Console for example. But I'm more of an IBM i than "x guy. But a Power system is not to be confused with a PC. You do not directly attach monitors, keyboards and mice.-----Robert Berendt IBMChampion

Use the DISPLAY system command to display information about the operating system, the jobs and application programs that are running, the processor, devices that are online and offline, central storage, workload management service policy status, and the time of day. ... DISPLAY CF: Displaying console group definitions: DISPLAY CNGRP: Displaying ...

Power on the HMC. During the process of powering on, the HMC checks to see which managed systems are available and communicating with the console. To ensure that each managed system is available before you power on the HMC, managed systems must be in standby mode or actively operating. Standby mode is indicated by the OK shown in the ...
