After spending quality time with the Dynojet Power Vision 4, we've found it to be a solid choice for those looking to fine-tune their bike's performance. With a user-friendly interface, the setup process was remarkably simple, ...

The definition file is the template file C3 Tuning uses to find a table within the stock file. The definition file provides unit conversions to translate from raw ECU binary to readable values and vice versa. The definition file will also apply patches and tells Power Core how to read channels when a Power Vision is connected to a vehicle.

Dynojet recommends a processor with a minimum of 2 cores, 2.0GHz minimum CPU Speed, and 4GB of memory (RAM) running Windows 10 OS or newer to adequately operate PowerCore version 3.0 (or newer) software. You might need Adobe Acrobat® to read .pdf format downloads from this website.

For tune availability before purchase please email info@fuelmotosa . Power Vision PV-3B is more powerful than ever with more tuning tables & enhancements! Note: we do not currently support SE Smart Tune Pro for 21-later models. **FREE PRE-PROGRAMMING OF YOUR POWER VISION, FUEL MOTO TECHNICAL SUPPORT, AND DOUBLE WARRANTY.**

The Power Vision tuning device updates the tables directly within the ECU to optimize the air/fuel ratio, keeping you in sync and in control. Power Vision easily connects through the OEM-style connectors, so installation won't keep you away for long. When you're back in the garage, your performance data can then be clearly seen using our ...
