

Ebay 3rd gen power steering system

The Synergy steering is what i have on my 2001. the 3rd gen steering will not bolt right up, if you are at stock lift height though. The drag link length would be too long. You would need a 4.5" lift or more for it to work. They are almost done with the 2nd gen steering. Its worth it!

CAUTION: MOPART ATF+4 is to be used in the power steering system. No other power steering or automatic transmission fluid is to be used in the system. Damage may result to the power steering pump and system if any other fluid is used, and do not overfill. Wipe filler cap clean, then check the fluid level.

I've tried a power steering pump from amazon, ebay, and rockauto . All of them whined like a supercharger even after weeks of letting it break in. Decided to replace all the gaskets on the oem pump so it would stop leaking and now this thing started to whine after a few weeks and now burps out power steering fluids right out of the reservoir lol.

My '99 4runner has worn power steering rack bushings that is causing sloppy steering feel and vibration at ~60mph. I was told by the shop I took it to that the only fix was a new power steering rack (\$900 parts and labor, yikes!). However, I found a neoprene power steering rack bushing kit on ebay for \$15. Anyone have feedback on using these?

Been driving for 4 months now with absolutely NO power steering I have taken it to my dealership three times. The first time they did a couple of diagnostic tests and when nothing turned up they told me it would cost me \$190 a hour for them to go through each of the 123 diagnostic code tests to try and find the cause.
