Enel Green Power, through its North American renewable subsidiary Enel Green Power North America, Inc., and Maire Tecnimont S.p.A., through its subsidiary dedicated to the deployment of technologies for the energy transition, NextChem, have signed a memorandum of understanding to support the production of green hydrogen via electrolysis in the United States.

As renewable energy continues to grow in the US and Canada, so does the demand to install utility-scale battery energy storage systems (BESS) to our projects. Our ambition to accelerate the energy transition and reach America's net zero carbon goal by 2035 drives our effort to install energy storage capacity at our sites.
