

Read the latest articles of Electric Power Systems Research at ScienceDirect , Elsevier's leading platform of peer-reviewed scholarly literature ... Sign in. Electric Power Systems Research. Supports open access. 7.5 CiteScore. 3.3 Impact Factor. Articles & Issues. About. Publish. Menu. Articles & Issues. Latest issue; All issues; Special ...

Electric Power Components and Systems publishes original theoretical and applied papers of permanent reference value related to the broad field of electric machines and drives, power electronics converters, electromechanical devices, electrical equipment, renewable and sustainable electric energy applications, and power systems.. Specific topics covered include:

Electric Power Systems Research. Supports open access. 7.5 CiteScore. 3.3 Impact Factor. Articles & Issues. About. Publish. Order journal. Menu. Articles & Issues. Latest ...

Electric Power Systems Research latest impact IF is 4.20. It's evaluated in the year 2023. The highest and the lowest impact IF or impact score of this journal are 4.75 (2022) and 2.70 (2014), respectively, in the last 10 years. Moreover, its average IS is 3.87 in the previous 10 years.

Advanced Power System Research Center is a multidisciplinary organization that will foster large, collaborative, research efforts in the areas of clean, efficient, and sustainable Power Systems technologies.

The 2022 impact factor of Electric Power Systems Research is 3.5, making it among the top 4% journals. The journal covers the disciplines of Energy, Electrical Engineering ... This graph shows how the impact factor of Electric Power Systems Research is computed. The left axis depicts the number of papers published in years X-1 and X-2, and the ...

Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy. The journal aims at presenting important results ...

Electric Power Systems Research. Show reviews 3 Review this journal Editor login. Journal info (provided by editor) ... Manuscript handling fee n/a. Impact factors (provided by editor) Two-year impact factor n/a. Five-year impact factor n/a. Aims and scope. The editor has not yet provided this information. Duration of manuscript handling phases ...

Electric Power Systems Research is a peer-reviewed scientific journal covering research on new applications of transmission, generation, distribution and uses of electric power. Its current editor-in-chief is Maria Teresa

Correia de Barros. According to the Journal Citation Reports, the journal has a 2010 impact factor of 1.396. [1]

The impact IF, also denoted as Journal impact score (JIS), of an academic journal is a measure of the yearly average number of citations to recent articles published in that journal. It is based on Scopus data. Impact IF 2023 of Electric Power Systems Research is 4.20. If the same downward trend persists, Impact IF may fall in 2024 as well.

The latest impact factor of ELECTRIC POWER SYSTEMS RESEARCH and all the other Web of Science journals is released on 20th June 2024 by Clarivate. Through this web page, researchers can check the impact factor, total citation, journal quartile, and journal aim & scope.

Impact Factor: 5.659. SCIMAGO SJR: 1.533. ... While the journal focused on Electric power system, it was also able to explore topics like Wind power, Process (computing), Automatic frequency control and Sensitivity (control systems). ...

Read the latest articles of Electric Power Systems Research at ScienceDirect , Elsevier's leading platform of peer-reviewed scholarly literature ... Sign in. Electric Power Systems Research. Supports open access. 7.5 CiteScore. 3.3 Impact Factor. Articles & Issues. About. Publish. Order journal. Menu. ... select article Dynamic load ...

Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy. The journal aims at presenting important results of work in this field, whether in the form of applied research, development of new procedures or ...

The overall rank of Electric Power Systems Research is 4239. According to SCImago Journal Rank (SJR), this journal is ranked 1.029. SCImago Journal Rank is an indicator, which measures the scientific influence of journals. It considers the number of citations received by a journal and the importance of the journals from where these citations come.

Elsevier Energy: Research for a just transition. We believe in a cleaner, fairer, and more connected world. Our energy journal program covers all fields of energy research across disciplines and topic areas. We are committed to publishing high quality, impactful research that supports clean, secure, and affordable energy for all.

Impact Factor: 6.6. SCIMAGO SJR: 3.726. ... including Electric power system, Control theory, Mathematical optimization, Control engineering and AC power. ... and Analysis Tools for Power Systems Research and Education (4120 citations) Definition and classification of power system stability IEEE/CIGRE joint task force on stability terms and ...

ISSN The ISSN of Electric Power Systems Research is 0378-7796 .An ISSN is an 8-digit code used to identify newspapers, journals, magazines and periodicals of all kinds and on all media-print and electronic. Electric Power Systems Research Key Factor Analysis Electric Power Systems Research?ISSN? 0378-7796 ??? ISSN????????? ...

Know all about Electric Power Systems Research - Impact factor, Acceptance rate, Scite Analysis, H-index, SNIP Score, ISSN, Citescore, SCImago Journal Ranking (SJR), Aims & Scope, Publisher, and Other Important Metrics. Click to know more about Electric Power Systems Research Review Speed, Scope, Publication Fees, Submission Guidelines.

IEEE Transactions on Power Systems (TPWRS) welcomes papers on the education, analysis, operation, planning, and economics of electric generation, transmission, and distribution systems for general industrial, commercial, public, and domestic consumption, including the interaction with multi-energy carriers.The focus of TPWRS is the power system from a systems viewpoint ...

Get access to Electric Power Systems Research details, impact factor, Journal Ranking, H-Index, ISSN, Citescore, Scimago Journal Rank (SJR). Check top authors, submission guidelines, Acceptance Rate, Review Speed, Scope, Publication Fees, Submission Guidelines at one place. Improve your chances of getting published in Electric Power Systems Research with ...

Research Impact Score\*: 2. Impact Factor: 1.5. SCIMAGO ... The journal explores issues in Electric power system which can be linked to other research areas like Wind power and Reliability engineering. The concepts on Electronic engineering presented in it can also apply to other research fields, including Power factor, Transformer, Harmonics ...

Electric Power Systems Research Impact Factor 2024 . The latest impact factor of electric power systems research is 3.3 which is recently updated in June, 2024. The impact factor (IF) is a measure of the frequency with which the average article in a journal has been cited in a particular year. It is used to measure the importance or rank of a ...

Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy. ... Electric Power Systems Research Impact Factor History. 2-year 3-year 4-year. 2023 Impact Factor . #N/A #N/A #N/A. 2022 Impact Factor . 4.745 4.76 4. ...

Power Syst. Res. Electric Power Systems Research is a peer-reviewed scientific journal covering research on new applications of transmission, generation, distribution and uses of electric power. Its current editor-in-chief is Maria Teresa Correia de Barros. According to the Journal Citation Reports, the journal has a 2010 impact factor of 1.396.

Power Systems Research (PSR) has been tracking the production of global engine-powered equipment since 1976. This data covers IC engines, battery- electric and hybrid-drive powertrain technologies for on-highway and off-road vehicles and equipment.

The latest impact factor of electric power systems research is 3.3 which is recently updated in June, 2024. The impact factor (IF) is a measure of the frequency with which the average article ...

Mission statement: The International Journal of Electrical Power & Energy Systems (JEPE) is an international journal for dissemination of the newest technologies and theoretical research in the area of electrical power and energy systems, aiming at inspiring interdisciplinary research across academia and industry and contributing to the ...
