[Turan Gonen] Electric Power Distribution System - Free download as Powerpoint Presentation (.ppt / .pptx), PDF File (.pdf), Text File (.txt) or view presentation slides online. An insulator string consists of porcelain discs connected by metal links to transmit electrical power overhead. The voltage divides evenly across each disc in the string, with equal potentials at each disc interface.

Provides an up-to-date account of electric power transmission lines along with the techniques and models used in transmission system planning and analysis. Basic material is carefully explained as are the vocabulary and symbols used by the industry. Text is divided into two parts: electrical design and analysis and mechanical design and analysis.

This document provides a list of Scilab codes written as part of a textbook companion for the book "Electric Power Transmission System Engineering Analysis And Design" by T. Gonen.
