EME Power Systems put in place a system, carefully calibrated to protect all of our contracted customers, in this instance we were able to free up spare cover to help a non-contracted site, this might not always be the case; the only way to be certain of getting the help that you need is to be covered by an EME Power Systems HV maintenance ...

EME Power Systems have not only carried out their work to the highest standards but they have also built in to the project their high level of experience and expertise by ensuring that that the system has been designed in such a way that my initial costs have been kept to a minimum. Steve Hobbs of Cardale Doors

Both oil and paper play a part in a transformer's insulation properties and whilst a routine test on the fluid will indicate its overall condition, including di-electric strength, there is a further test available to ascertain the papers condition, their tensile strength: a Furans test. Discovering degrading oil can be overcome by processing or replacing the oil. However, any ...

"Whilst these works were typical of the installation work that we carry out, the timing and environment certainly was not. We planned and delivered the scheme in a Covid-19 secure way at the height of the pandemic and it is a tribute to our installation teams that this essential work was not delayed and that our customers plans were kept on track as a result".
