He said: "We are working with a wide range of partners in Europe to develop more energy storage projects which will help the EU meet net zero targets through innovative battery-based solutions. These include developing pre-competitive technical blueprints for applications such as EV charging stations and renewable energy storage facilities."

The European Association for Storage of Energy (EASE) is glad to extend a warm welcome to its newest member Alpiq who joined EASE in September 2024. Lukas Gresnigt, Head Business Division International at Alpiq and Antonio Zecchino, Lead Storage Developer at Alpiq, accepted to discuss with us the expertise of Alpiq, in energy storage and ...

On 19 February 2019 the European Association for Storage of Energy (EASE) published a position paper explaining the crucial role of stationary energy storage in enabling a rapid and effective transition to a decarbonised transport sector. It calls on policymakers and other stakeholders to address the barriers that hamper the

In December 2019, the European Commission has presented the "European Green Deal ", a set of policy initiatives aiming at ensuring the EU becomes climate neutral by 2050. These policy initiatives have strong implications for the energy sector, especially concerning energy storage: new energy storage technologies will supply more flexibility and balance in the grid, providing ...

Maro? ?ef?ovi?, speaking at the EASE Energy Storage Global Conference in Brussels, Belgium. Image: Maro? ?ef?ovi? via LinkedIn . Energy storage must play a central role in enhancing Europe's energy security, enabling integration of renewable energy and lowering power prices, according to European Commission (EC) Vice President Maro? ?ef?ovi?.

Energy storage is a technology that holds energy at one time so it can be used at another time. Building more energy storage allows renewable energy sources like wind and solar to power more of our electric grid.
