Another reason that your F-150's backup camera could be malfunctioning is that the shifter is misaligned. If your truck doesn't know when you have placed your vehicle in reverse, then the backup camera won't be displayed when backing out. You can check if this is the issue by checking the gear indicator light on your truck's dash.

Another reason that your F-150's backup camera could be malfunctioning is that the shifter is misaligned. If your truck doesn't know when you have placed your vehicle in reverse, then the backup camera won't be displayed when backing out. You can check if this is the issue by checking the gear indicator light on your truck's dash.
