

Golf carts with lithium batteries

Are Lithium Batteries Good for Golf Carts? Yes, lithium batteries are the best type of batteries to power a golf cart because they last longer than conventional lead-acid batteries, charge faster, are lighter, and last up to five times longer than traditional batteries.

For most golf cart owners, the five lithium batteries we have suggested can be great choices - but it's worth doing that little bit of extra personal research to make sure that the battery you are eyeing up is right for you and your golf cart.

With more power behind the wheel than ever before, ELiTE lithium technology takes you farther, faster and with plenty of charge to spare. And with zero home maintenance and the longest battery warranty in the game, you can leave the green -- or your garage -- worry-free every time you take the wheel.

The maintenance-free ELiTE lithium battery pack powered by trusted Samsung SDI technology comes standard on the Liberty LSV. Get powerful performance regardless of your level of charge, and enjoy faster charging than with standard, lead-acid batteries.

Lithium batteries are new in carts, and they are saving golf cart owners lots of time and money as well. The initial costs of lithium batteries are higher, but they will not need to be replaced as often as standard electric carts. You can also purchase the Express S4 in a gas model that is 13.5 HP.

E-Z-GO® ELiTE(TM) Lithium Series vehicles are powered by zero-maintenance Samsung SDI lithium batteries and backed by the best warranty available. Proven during more than 15 million hours of drive time, no other golf cart offers the performance, efficiency and experience of ...
