I purchased a Solar System through Green Day Power in 2021 and 2022. Currently my system is not working. The parts needed are covered under the manufacture warranty however the labor is not.

Green Power Energy offers potential customers a snapshot of their 20-year savings outcome through its online calculator. To give you an idea of your potential financial returns with solar energy from Green Power, we received a ...

Installed my solar with Greenlight in 2017 with 25 year warranty on parts (panels, inverter,...) and 10 year original owner support. I started noticing that my solar output was low even on a nice sunny day and wrote emails (several of them), left them voice mails over 10+ days.

After 1st month I noticed we continued to get large electricity bills even after solar was installed. No increase in usage and we bought large enough capacity. We called manufacturer and they asked us to contact Green Day Power as they saw the panels not producing enough energy and installer(GD) should dispatch to fix. Ever since we were given ...

For green day company, all the people who came for installation were company employees, so they do not subcontract. All the employees were very professional and knowledgeable on what they were doing. They are very very punctual and very responsive. Process is very transparent and we are happy that we went with green day power.

The installation guys ran off and no reply from anyone from Green day solar. Secondly, I asked those guys install the inverter in the garage, They said as per the design its outside. we need extra money to install inside. If you like surprises go Greenday power.
